About the Book
Where some people see rubbish, Rosie Revere sees inspiration. Alone in her room at night, shy Rosie constructs great inventions from odds and ends. Hot dog dispensers, helium pants, python-repelling cheese hat: Rosie’s gizmos would astound—if she ever let anyone see them. Afraid of failure, she hides them away under her bed, until a fateful visit from her great-great-aunt Rose, who shows her that a first flop isn’t something to fear—it’s something to celebrate.

Conversation Starters
Whether you read the book aloud or children read it on their own and you discuss it later, use these open-ended questions to deepen the conversation. Remember not to judge their responses and to listen
thoughtfully and engage in a give-and-take that helps them expand upon their understanding of the book and its themes.

- What is the story about?
- How would you describe Rosie’s personality? Have you ever known anyone like her?
- Why did Rosie stop creating inventions? Have you ever felt like giving up?
- Have you ever had an idea for an invention; if so, what is it?
- How did Rosie’s great-great-Aunt Rose help her?
- What is persistence and how was it important in the story?
- At the end of the story, why were Rosie and her classmates cheering about their failures?
- Do you think the story challenges gender roles and stereotypes? How so?
- How do you think Rosie felt in the end?
- In your opinion, what was the main message of the story?

Talking Points
Below are some important considerations to highlight in order to make this a learning opportunity for your child and your family.

1. Persistence and Learning from Our Mistakes
   An important theme in the book is persistence and learning from our mistakes. Rosie was curious and liked to invent things but she got discouraged because her Uncle laughed at her about a hat she made for him. After that, she kept her dreams to herself because she felt confused and embarrassed. When she attempts to make an airplane for her great-great-Aunt Rose—who has always wanted to fly—the plane falls to the ground and she is discouraged again, thinking she will never be an engineer. Rose reassures Rosie that her “first try” was great and is all part of the process. In the end, Rosie and her classmates take joy in failing and making mistakes. Talk with your child about this important message: that it is important that they pursue and take pride in the things that they love and any pursuit takes time to get better. Share with them your own experiences of making mistakes and “first tries” and how those often lead to doing something better the next time around. Emphasize that we have to follow our passions and dreams no matter what and that failures along the way usually lead to better results the next time and are part of life.

2. Gender Roles
   As you read the book, highlight the way in which Rosie is portrayed throughout the story. She is curious, interested in making things and dreams of being an engineer (you may need to explain what an engineer does: a person who designs and builds complicated machines, products or systems). Talk with your child about how Rosie is depicted in the book, asking if they notice anything different about how she, as a girl, is being portrayed. You can explain that often in books, movies and toys/games, boys tend to be portrayed as inventors, scientists and engineers and girls are not. This is one of the many positive aspects of the book and should be emphasized. Talk with your child about gender roles and how girls and boys sometimes get messages about what they are “supposed” to like and be interested in and this can limit their ability to explore many different interests. Ask them about whether they have seen this in other parts of their lives and remind them
that it is important to follow their own dreams and interests regardless of societal expectations and stereotypes.

3. **Women’s History: Rosie the Riveter**

Together read the “Historical Note” on the back page of the book. If your child doesn’t know anything about that time period, explain that during World War II (more than 75 years ago), because many men were called to serve in the army, women entered the workforce in large numbers to make airplanes and ships for the war effort. *Rosie the Riveter* was a symbol that was created to represent American women who worked in that industry as well as factories and shipyards during World War II and she is also the inspiration for the character in Rosie Revere, Engineer. You can talk about the significance of this time period, as many women previous to the war were not working outside the home and not in those professions. For more background information, see History’s page on the topic. You can talk about what it might have been like to be a woman during that time period and having the opportunity to contribute in that way when they weren’t able to before.
