Table Talk: Family Conversations about Current Events

About Table Talk
Parents and family members often want to discuss current events and the news of the day. It’s a great opportunity to engage children in rich conversation, impart important values and encourage lifelong interest in the news and the world around them. These talks can happen on the way to school, during a walk or over a meal together. Family dinner is a key time to have these discussions. Research shows that dinnertime conversation benefits the health, emotional and academic outcomes for children of all ages.

Table Talk: Family Conversations About Current Events provides parents and family members with the tools they need to engage their families in conversations
about important news stories and other timely discussions about societal events. Each guide includes a topic summary, questions to start the conversation and dig deeper, ideas for taking action and additional resources.

How Systemic Racism Impacts Coronavirus Racial Disparities

The impact of coronavirus has been vast and devastating; its impact on public health and the economy is felt across the globe. Many communities are engaging in quarantine and social distancing. The job losses are staggering. Schools are closed and businesses are shuttered. Every day, people face the threat of illness and death of loved ones along with anxiety about the economic future of our nation and world.

Various U.S. cities and states are tracking demographic data which reveals COVID-19 is disproportionately impacting communities of color in the U.S. Communities of color are at increased risk of serious illness related to coronavirus
due to systemic inequities and structural racism in housing, employment, education and health care systems.
