Antisemitic Incidents at Anti-Israel Events and Actions Around the World

Updated: June 1, 2021

Since the start of the May conflict between Israel and Hamas, there have been numerous antisemitic incidents around the world related to the conflict. The perpetrators of these attacks deliberately targeted Jewish institutions in order to express their anger towards Israel.

Whenever anti-Israel actions target synagogues, Jewish community centers, kosher restaurants, Jewish owned businesses, or individual Jews – in other words, holding Jews collectively responsible Israel's actions – ADL considers such incidents as antisemitic. These actions intimidate Jews and prevent them from living openly and freely as Jews.
During the 2014 conflict between Israel and the terrorist group Hamas, dangerous incidents occurred in a similar context: attempts to breach synagogues while worshippers were inside; Molotov cocktails and other projectiles thrown at synagogues; and unprovoked assaults on Jews on the street with expressed linkage to the conflict. Jewish communities remember these incidents and worry about similar attacks.

Below is a selection of recent antisemitic incidents linked to the present conflict:
