

Mo'Ne Davis and Gender Stereotypes

Grade Level		Time	Common Core Standards
K-2	2-5	45 Minutes	Reading: R1 Speaking & Listening: SL1
MS	HS		

LESSON OVERVIEW

In 2014 Mo'Ne Davis, a 13-year-old girl, made news headlines as the first girl to ever pitch a shutout in the Little League World Series. At that time she was considered the “most talked about baseball player on earth right now” according to many observers in the sports world. Mo'Ne (pronounced Moh-nay) played baseball for the Taney Dragons of Philadelphia, PA. She was the only girl on her team, the first American girl to play in the Little League World Series since 2004 and is only the eighteenth girl to have played in the sixty-eight-year history of the Little League World Series. She was on the cover of [Sports Illustrated](#), the most prominent sports magazine and [Sports Illustrated Kids](#). In 2018, Mo'Ne chose Hampton University to attend and play softball.

This elementary lesson provides an opportunity for students to learn more about Mo'Ne Davis and, at the same time, explore gender stereotypes about sports and in other areas of their lives.

LEARNING OBJECTIVES

- Students will explore their own unconscious bias about girls and sports.
- Students will understand the term stereotype and how it relates to gender.
- Students will reflect on the negative effects of gender stereotypes.
- Students will learn more about Mo'Ne Davis and her potential to dispel stereotypes.

MATERIALS & PREPARATION

- Construction paper (one piece for each student)
- Crayons, markers (make sure to include colors that represent different skin complexions)
- *Post-it® Notes* (medium size, two per student)
- “SportsKid of the Year 2014: Mo'Ne Davis” article (*Sports Illustrated Kids*, December 1, 2014, www.sikids.com/si-kids/2016/01/12/mone-our-2014-sportskid-year, one copy for each student)
- Select a picture of Mo'Ne Davis for class viewing (suggested photos found at: [MSNBC](#), [NPR](#), [Flickr](#))

PROCEDURES

Warm-Up: Picture of a Baseball Player

1. Distribute one piece of construction paper and crayons/magic markers to all students. Tell students to close their eyes and picture a baseball player. What does the baseball player look like? Then have them open their eyes and spend 5-10 minutes drawing a picture of the baseball player they envisioned.
2. When students complete their pictures, have them hold up their pictures at the same time or quickly tape them to one wall and have students do a “gallery walk” to see them all.

Note: It is very likely that most, if not all, of these pictures will be of boys and/or men and many of them may be white; currently only 8.3% of Major League Baseball players are black.

3. Engage students in a discussion by asking the following questions:
 - What do you notice about the pictures?
 - What are the similarities? What are the differences?
 - What was the first picture that came into your mind?
 - Why do you think most of the pictures are of boys or men (if that is the case)?
4. Explain to students that all professional baseball players are male and most players in Little League baseball are boys. This may be one of the reasons they drew male players. Also, they may have a stereotyped view of what a baseball player (or a sports player) looks like.
5. Hold up a picture of Mo’Ne Davis. Ask students: *Has anyone heard about Mo’Ne Davis? What do you know about her?* Explain that Mo’Ne Davis plays Little League baseball, is the only girl on her team and just became the first girl player to pitch a shutout in the Little League World Series.
6. Ask: *When you pictured a baseball player, did you picture someone that looks like Mo’Ne Davis? Why or why not?* Explain that in this lesson, they will be learning more about gender stereotypes and Mo’Ne Davis.

Understanding Stereotypes Activity

1. Ask students: *Does anyone know what a stereotype is?* Come to a definition of **stereotype** as the false idea that all members of a group are the same and think and behave in the same way. Explain that prejudice is often based on stereotypes.
2. Provide an example of a stereotype such as: Girls aren’t good at sports. Ask students the following questions. Explain they just need to answer these questions “yes” or “no” and not name specific people.
 - Is this statement true?
 - Is it true for some girls but not all girls?
 - Is the opposite true for boys (that they are all good at sports)?
 - Do you know girls who are good at sports?
 - Do you know any boys who aren’t good at sports?
3. Have students turn and talk with a person sitting next to them. Have them spend five minutes generating a list (on paper) of stereotypes for both boys and girls. They should come up with at least two stereotypes for girls and two for boys. Stereotypes can include interests, behaviors or the way people think.

Note: Some students may feel reluctant to express stereotypes for fear that others will think they believe those stereotypes. Emphasize that the words and ideas students share do not necessarily reflect their actual beliefs but they underscore how deeply ingrained stereotypical thinking is in all of us. Assure students that they should share without fear of judgment.

4. After five minutes, have each pair share an example out loud and not duplicate a response that another pair shared. Record their responses on the board, which might look something like this:

Stereotypes of Girls

Girls aren't good at sports.
Girls like to play with dolls.
Girls like to make jewelry.
Girls are interested in their appearance.
Girls like art and reading.

Stereotypes of Boys

Boys love sports.
Boys like to play with action figures.
Boys like videogames.
Boys are stronger than girls.
Boys like sci-fi and math.

5. Engage the students in a class discussion by asking the following questions:

- What do you notice about the stereotypes?
- How do these stereotypes make you feel?
- Are the stereotypes true for all girls or all boys?
- How do stereotypes hurt boys and girls?
- Where do stereotypes come from?

As students respond to the last question about where stereotypes come from, generate a list of ideas on the board/smartboard, eliciting suggestions from the students. The list might look something like this:

- Products: toys, colors, bed sheeting, school supplies, clothes, backpacks, etc.
- Media: ads, video games, TV shows, movies, websites, etc.
- People: friends, family members, teachers, other adults
- Books and magazines
- Personal experiences

6. Explain that stereotypes are harmful because they can be the foundation for prejudice which can lead to discrimination. Stereotypes can also be hurtful because sometimes people believe the stereotypes about themselves (as in girls and sports) and don't explore things they may be interested in and not take advantage of certain opportunities. Ask: *Can anyone think of an example of how this has happened?*

Reading Activity: Who is Mo'Ne Davis?

1. Distribute a copy of the article "[SportsKid of the Year 2014: Mo'Ne Davis](#)" and two *Post-it*[®] Notes to each student. Give students 10 minutes to read the article silently.

Note: You may also choose to read the article aloud to the students.

2. After reading the article, have students write something they learned or a fact about Mo'Ne Davis on one post-it. On the other post-it, have them write one question they have about Mo'Ne Davis or girls and baseball. Have them put all their fact post-its on one wall (or side of the board) and their question on the other side. Read the post-its aloud and summarize everything they know about Mo'Ne Davis and use their questions as an opportunity for further research on this subject as a homework assignment or extension activity.
3. Engage students in a discussion by asking the following questions:
- Do you think it was difficult for Mo'Ne Davis being the only girl on her team? Why or why not?
 - How does Mo'Ne Davis challenge stereotypes?
 - Do you think she had to be a better baseball player than the boys?
 - How can she be a role model to other girls? How can she be a role model for all kids?
 - How do gender stereotypes hurt both boys and girls?

Providing Contextual Information

If time allows, provide some contextual information for students about Title IX legislation as well as about girls and baseball. Here is some information to share:

- In 1972, a law called Title IX was passed, which banned discrimination based on gender in education programs. Before Title IX, a girl would not have been able to play baseball with boys. One of the most important impacts of the law was girls' ability to play sports. For example, before Title IX, one in 27 girls played varsity high school sports. By 2001, one in every 2.5 girls played. The year before Title IX was enacted, there were about 310,000 girls and women in America playing high school and college sports; today, there are more than 3,373,000.
- Despite Mo'Ne Davis' success, there are still limitations. More than 100,000 girls play youth baseball but only [1,284 girls](#) played high school baseball during the 2018-2019 academic year and all of them were competing against boys. According to Justine Siegal, founder of Baseball for All, "Girls are not encouraged to play baseball. And if you tell a girl she's not encouraged to play baseball, what else won't she be encouraged to do?"
- Just 0.27% of high school baseball players are girls. Some of them do succeed against boys, and if an exceptional talent like Mo'Ne does decide to stick with the sport in high school, she certainly could keep thriving. But she'd most likely be the exception. "So many girls are bullied off of teams," says Siegal. "Sometimes it's the players, but mostly it's coaches and other parents doing the damage. Usually it's the adults."
- There have been several important milestones for women in sports. For example, in 2020, Sarah Fuller was the first woman to play in a Power Five college football game. Also in 2020, Kim Ng became Major League Baseball's first woman and first Asian American General Manager. As an extension activity, you can have students learn more about women who have broken gender barriers in sports.

Closing

Have students think about what they learned in today's lesson and do a go-round with each student completing this sentence: I used to think _____ but now I think _____.

EXTENSION ACTIVITY IDEAS

- Have students learn more about Title IX and its impact on girls and women, doing research on statistics and gains made over the years. In addition, they can create a survey or conduct interviews with girls and women in different generations (friends/cousins, mothers/aunts, grandmothers) to find out what their experiences was as girls and draw conclusions as to how things have changed over the years.
- Have students collect photos, online pictures, headlines/titles and advertisements that both perpetuate and dispel stereotypes. After collecting the pictures and words, create a class bulletin board or an online exhibit (using Tumblr) with these pictures to share with others. Write captions on the pictures that describe what the stereotype is or how it challenges current stereotypes.
- Learn more about Mo'Ne Davis, including who she is as a person and more about her experience in sports. Compile all the information in order to create a baseball card (using cardboard cut into pieces of approximately 4" x 5"). Have students imagine her as a professional Major League Baseball player, taking into consideration what the baseball card would say about her. They can also anticipate what her baseball statistics might be and include those on the back of the baseball card.
